Ref No.: PW-190814

Dear Sir/Madam,

Re: MJ Smith Ground Preparation

MJ Smith Ground Preparation (MJ Smith) regularly conduct infrastructure maintenance tasks for Forestry Corporation such as:

- Routine road maintenance – grade, form, roll
- Gravelling – re-sheet and patch gravel
- Drainage feature crossing maintenance and installation
- Pipe installation
- Installing erosion control measures

The road works are performed to various specifications depending whether the road or trail is to be used for general public access, log truck haulage or fire trail maintenance.

MJ Smith consistently produce excellent results which are reflected in our quarterly performance reviews, where they consistently score in the top 1 or 2 contractors for the quarter.

MJ Smith exhibit a professional attitude to their work, with experienced staff and very good gear. I have found them willing and able to deliver our projects to specification in a cost effective manner. They have an excellent safety culture within the business.

I am comfortable in providing a reference to any other party in relation to the work they have conducted for Forestry Corporation which I have supervised.

Regards,

Peter Walters
