

1 April 2015

MJ Smith Ground Preparation & MJ Smith Waste Management
PO Box 31 Woodenbong NSW 2476

Dear Kerrie

Reference from Seqwater

MJ Smith Ground preparation Pty Ltd has undertaken a number of major flood damage projects for Seqwater following the 2011, and 2013 flood events.

These projects were worth a combined total in excess of \$500,000, the projects involved supply delivery and placement of rock fill material, river bank stabilisation, installation of rock mattresses and the installation of concrete protection work. The MJ Smith group supplied excavators, trucks, and other miscellaneous plant of a high quality to successfully deliver the works.

MJ Smith operations group were of extremely high standards of professionalism, particularly in workplace health and safety standards and culture evident throughout the organisation. The workmanship was of a high standard while delivering within a timely manner.

The nature of each project required consultation with local landholders and other Seqwater personnel where they dealt professionally and worked hard to ensure these customers were completely satisfied.

As the program director, MJ Smith Ground Preparation Pty Ltd was an extremely professional team to work with on the flood damage projects and I have no hesitation in recommending them.

Yours sincerely

pe 

Peter Myatt Strategic Maintenance Advisor
