

Our reference
SF0102-15:

To whom it may concern

This is to confirm that MJ Smith Ground preparation has been engaged, on a regular basis, to conduct various Vegetation management programs within numerous Tweed-Kyogle Area National Park Reserves. The Company has also conducted extensive Road and fire-trail maintenance, reconstruction and drainage works.

In 2013 M J Smith was awarded the NDRRA Tender to provide road and fire-trail repairs to numerous Reserves within the Kyogle Area. The Tender Selection Panel was most focussed on the Contractors' ability to satisfy rigorous Environmental and WH&S standards and deliver the works within strict time frames. The company met all criteria and was able to provide an outstanding result within time-frame and budget.

The Companies' high standard of plant hygiene and general repair, selection of suitable and proficient operators and internal Standard Operating Procedures ensure consistent, effective and environmentally sound operations. The Company has always been able to provide concise reporting and communication when required.

The high standard service provided by M J Smith Ground Preparation is exemplary in all respects and reflects the high standards required for working within OEH National Parks Estate.

I have no hesitation in recommending them

Yours sincerely

Steve Foreman
Senior Field Supervisor
Tweed- Kyogle Area
